Special features

Hazylight 2 is operated with the Hazy lamp bases. To guarantee even light distribution, a matted protecting glass should be used at all times. Pulso Hazy lamp bases 2, 4 are fitted with glass counter-reflectors for uniform light distribution. Pulso Hazy lamp base 8 for thermal reasons is fitted with an aluminium counter-reflector. The glass counter-reflector with progression and the aluminium counter-reflector should remedy the light concentration in the centre of the light area.

Application

Excellent light for object and people shots of all types.
