

Product designation

Pulsoflex C	Article no.
Pulsoflex C 70 x 70 (28" x 28")	33.441.00
Pulsoflex C 100 x 100 (40" x 40")	33.442.00
Pulsoflex C 60 x 100 (24" x 40")	33.443.00
Pulsoflex C 35 x 120 (14" x 48")	33.444.00
Pulsoflex C 150 x 150 (60" x 60")	33.445.00
Pulsoflex C 80 x 140 (32" x 55")	33.446.00

Product description

Simple soft boxes as adapters to Pulso and Primo lamp bases, to the small lamps Picolite and Mobilite and all broncolor compact units with the Pulso bayonet and the broncolor HMI lamp base F575. They are available in different sizes, which differ in their shapes and dimensions.

By using two different adapter rings, it is possible to change the character of light. (See paragraph "accessories".)

Scope of delivery

4 flexible supports, 1 reflector cover black/silver, 1 diffuser, transport bag

Attention: The adapter rings have to be ordered separately.

Adapter ring without reflector	Art. 33.400.00
Adapter ring with integrated reflector	Art. 43.100.00

Reason:

The separate delivery allows the client:

1. to choose the character of light.
2. to operate several Pulsoflex units with one adapter ring – more reasonable.

Technical data

**f-stop at 2 m, 100 ISO
3200 J**

Square reflectors

Pulsoflex C 70 x 70	f: 32 4/10
Pulsoflex C 100 x 100	f: 32 4/10
Pulsoflex C 150 x 150	f: 32 1/10

Rectangular reflectors

Pulsoflex C 60 x 100	f: 32 4/10
Pulsoflex C 35 x 120	f: 32 2/10
Pulsoflex C 80 x 140	f: 32 3/10

Compatibility

Compact units Minipuls C40, C80, C200, D160, D160 plus
Minicom 40 ; 80, Minicom 40 RFS, 80 RFS

Lamp bases: Pulso, Primo and Flashman lamp bases
Small lamps Picolite and Mobilite (only with light reflectors like
Pulsoflex C 70 x 70 or C 35 x 120 and Pulso adapter,
Art. no. 33.501.00)

Pulsoflex C 70x70 and C 35x120 cannot be used with the Flashman lamp base.
(Heat accumulates due to absence of fan.)

broncolor HMI F575: from edge length 80 cm

Accessories

Art. no. 33.286.00	Scrim foil D 0,5
Art. no. 33.400.00	Adapter ring without reflector
Art. no. 43.100.00	Adapter ring with integrated reflector

When using the adapter ring with the integrated reflector a high centred light concentration will be attained (Hot Spot), which can be eliminated by using the Pulso F lamp. In addition, with the "Hot Spot" you get more light.

Application

The Pulsoflex C reflectors feature an excellent light quality with a brilliant detailed reproduction. The material combination of silver reflector and diffuser produces an ideal light output. The fabric diffuser ensures an uniform distribution of light, admitting a slight concentration in the middle, thereby allowing a highly brilliant reproduction with bright highlights. Illumination with Pulsoflex reflectors is by far superior to the diffuse illumination with umbrellas, since considerably less stray light is produced and light may conveniently be controlled and influenced. Stray light can also easily be screened against the camera. Transporting these folding reflectors does not cause any problems. They are ideal for use in the studio as well as for on location, in industry, in trade etc. There is hardly a sector in object, advertising, fashion and portrait photography where the Pulsoflex C reflectors are unsuitable.
