

28mm (or 16mm) die cast aluminum socket and 16mm stud.

Aluminium version
Electric welded aluminum tubing for higher mechanical performance and reduced weight.

Steel version
Chrome-plated steel tubing.
This surface finishing lasts longer, prevents oxidation and gives the product a polished look.

Excellent protection against corrosion and wear is ensured by aluminum anodization.

All versions have levelling leg for better stability.

Shock-resistant square section tubing.

All stands in this series can be equipped with wheels (including types with brakes).

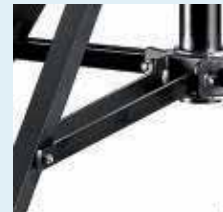

All knobs are made of aluminum and threads are riveted for preventing losses.

Parts made by die cast aluminum to ensure longer lasting mechanical performance and extension linearity of column.

Anti-extraction collars.

Captive lock offs thread into rust free steel.

Assembled using bolts instead of rivets for simpler maintenance.

Storage pin.

Double braced legs for extra stability, resistance and safety.
