

Working height up to 610cm.

Long-extension versions can replace towers for lighting or loudspeakers.

Double safety mechanism with rack direct transmission and secondary safety lock in each section, with neither pulley nor cables.

No drag adjustment needed.

Anti-fall safety drag.

Parts made by die cast aluminum to ensure longer lasting mechanical performance and extension linearity of column, all components inside transmission box are made via precision casting.

Chrome-plated steel tubing. This surface finishing lasts longer, prevents oxidation and gives the product a polished look.

Detachable steel crank handle with top spider housing.

28mm socket.
Windbracing lugs included.

Assembled using bolts instead of rivets for simpler maintenance.

Steel or aluminum square section single braces on legs for maximum stability, resistance and safety.

Handle on lower spider for easier folding of base.

Standard version features braked rubber wheels. More wheels and feet available, including tire-equipped wheels.

Patented technology keeps wheels vertical even when the stand is closed, for ease of movement.
