

Our Grip Heads have been specifically designed to hold scrims, flags, floppies & cutters mounted on Century stands, or butterfly frames mounted on overhead stands during film, video or photo shoots.

Extension offset arms, used in combination with Grip Heads, provide an extended grip point for scrims, flags and small lights, and are available in two lengths: 20" (51cm) and 40" (102cm).

The Grip Head can be combined with other accessories to solve most light and light modification accessory positioning problems.

Grip Heads are available in two specific diameters, the standard is 2 1/2" (8mm) the Jumbo version is 4 1/2" (10mm).

The 4 1/2" (10mm) version slotted disc accepts round tubes of 10/13/16mm diameter while the square version accept tubes from 5mm to 8mm diameter.

The Jumbo 4" Grip head slotted disc accepts round tubes of 10/13/16/25mm diameter.

All Grip Heads are equipped with special non slip grip pads for secure and precise control.

### SNAP-IN GRIP HEAD D210 **B**
