Examples of safety features include cranks that cannot accidentally unwind, captive lock-off knobs, rust proof dachromatic treated sockets, high efficiency wheel brake shoes, rock-solid stand locking collars which ensure all-weather operation and first class quality components in steel, stainless steel, aluminium tube and die cast aluminium.

Manfrotto assures a fast and effective after-sales support, including availability of spare parts for all of our products.

Manfrotto's range of stands consists of several product families which differ in design and materials depending both on the applications they are intended for and on the light type they have to support. These supports can be distinguished by the materials they are made of and two tubing technologies: electric welded aluminium and steel. Special attention has been paid to multiple technical solutions like pneumatic damping and levelling legs, making these stands unique. The existing versions allow for extensions between 21cm and 550cm, with payloads between 1.5kg and 200kg.

A stronger and more ergonomic handle gives you a big hand while securing stands into the operating position.

Just a click away from your baby. Push on the new locking device and detach one stand, prompt for usage.

Our extremely modular background support system is reliable, simple to use and flexible enough to match most of your support needs for paper, drapable, hand-painted or canvas backgrounds, in the studio or on location. For core mounted backgrounds the system used is based on the Expan chain operated drive developed by Manfrotto.

The Expan can be mounted on dedicated hooks which vary in shape and design depending on the number of backgrounds to be used.

If, as usually happens with canvas backgrounds, there is no central core around which to wrap the background material, Manfrotto provides a three section telescopic pole that can be attached on top of a set of two stands, making it ideal for location assignments.

MOTORISED EXPAND BACKGROUND SUPPORT SYSTEM

Manfrotto motorised background support system composed by:

CONTROL BOX - 220V 852

Main control box power supply voltage - 230V 50Hz (European version) with Infra Red remote controller. Manfrotto's motorised EXPAN system is based on the well known manual EXPAN device, a fast and efficient paper background drive set designed by Manfrotto to easily and rapidly roll and unroll all types of backgrounds (using a similar technique to that used on window blinds). The 852 and 851 EXPAN background units build on the practicality of the original concept and add motorised, remote controlled practicality and ease of use to perfectly control the deployment of up to 10 backgrounds.

Controls up to 10 motors (therefore 10 backgrounds).

Operating functions controlled by included IR remote controller.

Advanced IR communication functions.

- Remote controller and control box are both programmable for operation on one of seven different channels - therefore if two control box systems are used in the same room, they can be set to different channels to avoid interference. In this case, it is not possible to control both main control boxes with one remote IR controller.
- Communication protocol IRUP Infra Red over UPSEC Protocol.
- Advanced IR receiver is very sensitive to remote controller signal but extremely disruption-proof.
- Advanced background motor control functions.
- Each channel has independent, programmable background stop levels for max and min extension positions. Positions are remembered even after power off.
- Manual mode background positioning.
- "Overload sensor" automatically stops motor to protect equipment in case of overloading.
- "All backgrounds up" function automatically rolls all backgrounds with a single touch of a button.
- "Background Start-up" function for easy background positioning in manual mode.
- "Fast stop" function stops the background immediately, also reduces motor inertia after power off.
- Advanced background rolling modes, which speed-up system operation i.e. rolling up unused backgrounds.

Integrated easy-read display (digit height 45mm) shows selected back-ground number.

Standby mode for minimised power consumption.

Internal software upgrades possible via ordinary PC (cable and software upgrades supplied separately).

Communication follows UPSEC protocols to permit future extensions of the product (e.g. control by PC, radio, etc.).

Sound signals for easy operation.

Customisable - user can change parameters of the control box such as background working modes, sound on/off, etc.

Owing to differences in international standards, main power supply cable is not included.

Each control box has two "test" functions, which roll selected backgrounds up and down.

Background roll supporting spigots Single version only (1 pair for each background to be supported): Code: 850 Control box with Infra Red remote controller 2 versions are available depending on voltage of local mains electric supply: Code: 851 (for 110V supply) Code: 852 (for 220V supply) Hooks (pair) 3 versions to support 4/6/10 backgrounds: Code: 854-4 Code: 854-6 Code: 854-10

The Sky Track System is a comprehensive range of lighting suspension for all situations from small studios to the largest ones. Manfrotto line includes the versatile ceiling mounted, rails, manual and motorised pantographs and a wide range of brackets and support.

BLACK ANODISED 3M RAIL FF6003B

These rails are made in section of black anodised aluminium in standard lengths as listed. For fixed rails, longer sizes are obtainable by fitting two or more rails together. Sliding rails cannot be joined. To connect two fixed rails use code FF3208. You must always support the junction of two rails with a ceiling attachment placed on the junction itself. Moving rails longer than 3m must be supported with more than two fixed rails. The maximum distance (B) between any of these fixed rails is 2m (see drawing).

ANCHORAGE POINT

The spacing of the rail support brackets depends on the load anticipated on the rail itself, but should generally be in accordance with the table below, "A" indicates the distance between two anchorage points. However we advise that fixing brackets should not be spaced more than 2m apart.

BRACKET FOR CEILING ATTACHMENT FF3210

Bracket for ceiling attachment of the rail.

It is advisable to pre-assemble these brackets on the rails at ground level to ensure correct alignment before screwing to a ceiling.

Allows height differences in ceilings of maximum 2cm; combining two brackets you can compensate for differences of maximum 4cm.

ADJUSTABLE BRACKET FOR IRREGULAR CEILINGS **FF3215**

DOUBLE BRACKET FOR RAIL CROSSINGS FF3211

This is used to permanently attach two rails at a right angle or parallel.

CEILING BRACKET WITH 30CM EXTENSION **FF3216**

Used alone or in combinated these brakets allow the attachment of the rails at the desidered height.

CEILING BRACKET WITH 50CM EXTENSION **FF3218** Not illustrated

CEILING BRACKET WITH 100CM EXTENSION **FF3220** Not illustrated

EXTENSION BRACKET FOR VARIOUS HEIGHTS **FF3215A**

Its length is adjustable from 10cm to 15,5cm. Using the clamp screw, you can obtain all intermediate sizes. Provided with a security lock, in case the regulating screw loosens, blocks the bracket at maximum extension. It's used to compensate for height differences in ceilings of 5,5cm or more, with combinations of other brackets. It's also used for obtaining intermediate sizes in combination with the extendable ceiling brackets.

KIT OF 4 END STOPS WITH 4 CABLE CARRIAGES **FF3207**

These fit to the holes on the ends of a rail to prevent carriages leaving the rail and to prevent moving rails leaving their carriages. IMPORTANT: must be fitted to upper and lower holes on moving rails but only to lower holes on fixed rails.

ALIGNING CONNECTORS FOR FIXED RAILS **FF3208**

A pair of clamp plates with screws to join two fixed rails together by clamping across the junction on the upper guide, using holes provided in the rail. IMPORTANT: the junction must always be supported by a rail-mounting bracket placed astride

BRACKET FOR TUBE ATTACHMENT FF3214

This can be fastened to tubes with diameters from 35mm to 50mm inclusive. It's used to directly support the rail that can be fixed in place either longitudinally or transversely. This bracket can be used as a brace for fixed supports, as well.

Can be attached directly by screws or rods with a maximum diameter of $1/2^n$. Before mounting the bracket it is advisable to standardize the length of both the rods and screws. Fix the bracket between a nut allowing the screw on the inside of the bracket to protrude about 1,5cm. When fixture is completed, it is then possible to regulate a perfect rail levelness by adjusting the nuts which fasten the brackets.

Comprised of a bracket to be attached to the ceiling with 4 screws, a 1m long M12 rod completely threaded, 4 M12 nuts, and a bracket for the rail fixture. The rod can be cut to the desidered size and then attached to the bracket by way of the nuts supplied. The rod must protrude approx 1cm on the inside of the bracket.

When fixture is completed, it is then possible to regulate a perfect rail levelness by adjusting the nuts which fasten the brackets.

DISMOUNTABLE SLIDING CARRIAGE WITH 4 WHEELS AND 16MM SPIGOT **FF3228**

This carriage can be inserted directly at any point on the rail by unscrewing the wheel plate. This is used when it becomes necessary to add a supplementary carriage to an already assembled RAIL SYSTEM installation. It is free-sliding and is suitable for normal loads.

It can be positioned between a pantograph and utilisation (illuminator, small bank, flash, video camera, etc.) or it can also be mounted onto a stand. It allows a combined rotation of 360° on axis X and 110° on axis Y. It is powered by two 24 Vdc motors that must be fed and operated by an electronic power supply FF3288M/FF3286M1; motor powers the rotation on axis X and the other on the axis Y.

DOUBLE SLIDING CARRIAGE FF3232

Both the upper carriage and the lower one are free-sliding.

DOUBLE SLIDING CARRIAGE WITH DOUBLE BRAKE **FF3235**

This is equipped with brakes on both upper and lower carriages. The upper brake blocks the carriage on the fixed rail, while the lower carriage's brake blocks the sliding of the moving rail.

DOUBLE SLIDING CARRIAGE WITH ONE BRAKE **FF3236**

This is provided with a brake on only one carriage. Normally, the carriage with brake is mounted on the fixed rail so that it is locked into place enabling the mobile rail to slide. If the carriage with brake is mounted onto the mobile rail, you obtain the opposite effect, that is, the sliding of the mobile rail gets blocked, while the carriage can freely slide on the fixed rail.

MOTORISED DOUBLE CARRIAGE FF3350

The upper carriage is powered by a 24 Vdc motor which must be fed and operated by an electronic power supply code FF3288M/FF3286M. The lower carriage is equipped with a brake which blocks the mobile rail from sliding.

PANTOGRAPH TOP 4C FF3514N86

The pantograph is made of aluminium (P-AI MgSi UNI 3569) and manufactured according to DIN 15560-46. The attachments at both ends of the pantograph are 16mm, male on the bottom and female on the top. The load is supported by a steel cable of 2mm. diameter (safety factor 12). Loads up to 12kg can be suspended using only the patented friction device, while loads up to a maximum of 18kg require the use of the optional springs. The pantograph can be regulated to keep suspended loads from 1 to 18kg perfectly balanced. By turning the coulored notched ring you can adjust the pantograph's friction; this will ensure that the load remains stable when set in position, but that it will move smoothly up and down when necessary. In any case, it is always advisable to use the springs to aid raising your pantograph. When choosing the additional spring(s) for your pantograph, you will first need to know exactly which model of pantograph you have, in order that you can select the spring of the correct length. If you have one of the new compact pantographs (with grey-painted "scissors"), look at the colour of notched ring the 2m version has a red notched ring, while the 3.8m version has a blue notched ring. After having identified the length of the pantograph, choose the appropriate spring(s) by refering to the table below.

Corporate Social Responsibility

SORPORATE JE ESOCIALISE RESPOESEBILE

CSR

an essential value for Manfrotto. We consider Corporate Responsibility as a significant way to employ our people energy and passion in order to generate a meaningful change. For this reason we are involved in several projects to support the fundamental human rights, particularly for kids, and to define specific programs aimed to minimize

Corporate Social Responsibility is

the environmental impact. To support these causes we actively provide funding or equipment to the organizations we sustain. One of our main projects, started in 2007, is to sponsor the set-up and diffusion of the temporary and touring exhibition "Acholi un popolo da amare", about Acholi refugee camps in Northern Uganda, a country that suffered 20 years of civil war. This

exhibition has two objectives: the first one is to promote the further knowledge of the situation of this African tribe, and the second one is to raise funds to realize important humanitarian interventions in the area. Moreover we are supporting an international program run by the Dottor Clown Italia association, which aim is to keep suffering people amused during hospitalization.

In our everyday approach we adopt policies marked by fairness in order to improve outward transparency for our shareholders. Because all human activity has an inevitable impact on the planet and can be contained and mitigated through research and the adoption of cutting-edge solutions, we have opted to use electrical energy from renewable sources for our most important plants. We operate through certificates that are issued in the country where the production of electrical energy from renewable sources takes place. This encourages the development of a global renewable energy sources market and therefore promotes the spread of new production capacity. Social responsibility commitment is part of our company philosophy, an important part of our growth.
